1. Release

RELEASE NUMBER	2.2.4	
TYPE		URGENT
APPLICATION	Corona Test Prescription & Consultation	
VERSION		
DATE ACCEPTATION	12/11/2020	
DATE PRODUCTION	13/11/2020	

2. Hot Fix

2.1. Coverage of doctors who do not have an INAMI/RIZIV

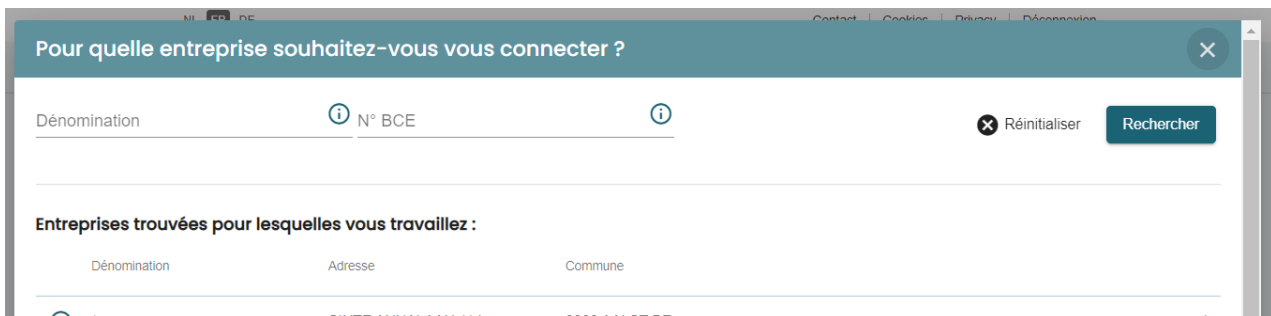

- A doctor who does not have an INAMI/RIZIV number will now be able to find in the application the companies for which he works.
- A known issue for the management of mandates for company doctors is present and will be corrected in the next release:
 - If doctor B does not have an INAMI number, Doctor B who receives a mandate from another doctor will not have access to Dashboard data (such as test results)
 - If doctor A does not have an INAMI number - Doctor A gives a mandate to another doctor B: the authorized doctor B will not see the company space because doctor A is not recognized as a doctor by the application.

2.2. Removal of “companies” from the result list of « collectivities »

- It is no longer possible to find a « company » type in the result for « collectivities »

2.3. New filter « company number (KBO/BCE)” in the search of companies

- The list of "companies" available for a company doctor can be filtered with the "BCE number"

3. New features

3.1. New filter « part-time artistic school » in the collectivity search

- A collectivity can be searched under the new "Type of organization" "Part-time artistic education"

The screenshot shows a search interface titled "Chercher collectivités". It features several input fields: "Dénomination", "Code postal", "Commune", and "Rue". A dropdown menu for "Type d'organisation" is open, displaying a list of options: "Aide aux sans-abris", "Crèches, jardin d'enfant, ...", "Ecoles maternelle", "Ecole primaire", "Ecole secondaire", "Enseignement artistique à temps partiel et ens...", and "Universités et Hautes Ecoles". Below the dropdown, there are "Réinitialiser" and "Rechercher" buttons.

3.2. Better display of « the las test result » in the dashboard

- The display of data in the dashboard has been revised to avoid some possible confusion
- Removal of the "result" column
- Added of the "last known result" next to the "last known test run date"
