2. Updated features

2.1. Business rules modifications

2.1.1. Update electronic contact data

The priority for the update has been modified :

1. Reservation Tool
2. CIN / NIC
3. CoBRHA

2.1.2. List schedulable vaccinations

If the parameter “havingElectronicCommunicationChannels” is set to “True”, the method returns only people with an email address. Before, this method returned people with at least two electronic communication channels.

If the parameter is set to “False”, the method returns people without an email address.

If the parameter is not present, no filter will be applied.

2.1.3. Activate by oldest persons first

If the parameter “havingElectronicCommunicationChannels” is set to “True”, the method activates only people with an email address. Before, this method activated people with at least two electronic communication channels.

If the parameter is set to “False”, the method activates people without an email address.

If the parameter is not present, no filter will be applied.

2.1.4. Methods with the vaccination code in the url

The API accepts now that the vaccination code is given in lower case.

“V56ad76debexxxx” and “v56ad76debexxxx” are now both accepted.
