1. Release

RELEASE NUMBER		
TYPE		URGENT
APPLICATION	Script & Forms	
VERSION		
DATE ACCEPTATION	10/03/2021	
DATE PRODUCTION	11/03/2021 (evening)	

2. New features

2.1. Script 1B - Manual assignment of a SEPP to process the ticket via eHealth box

In script 1B, a collectivity added manually by an operator or that does not have a SEPP assigned from the eHealth data base 'collectivity' cannot be processed via eHealth box.

In these cases, the ability to manually add a SEPP from a predefined list to a collectivity is now available. This list of SEPP is managed on eHealth side.

Each time a SEPP is manually selected, a check of the encryption of the eHealth box is done in Script & Forms (check ETK), and the message confirming the availability of the mailbox is displayed on wrap-up code zone.

- Encryption is OK: "eHealth Box available"
- Encryption is NOT OK: "eHealth Box is not available"

2.2. Script 2A 2B 3B - Addition of the mention "Cohabitant"

For tickets 2A, 2B and 3B created for the cohabitant of an index patient, the mention **"cohabitant : yes"** is displayed at the top of ticket informations.

2.3. Implementation of Address Auto-complete on all scripts

Addition of the library to help filling addresses in all the scripts (street, zip code, town). This library is already partially added in the scrips, now it is added in these fields:

- Script 2A: Q6 "where will you stay in isolation?"
- Script 2C: Q9 "where will you stay in isolation?"
- Script 1A
 - Manual adding of collectivity form (hide by default)
 - Manual adding of organization form
 - o Adding address for contact "Other"
- 1B: Manual adding of Collectivity form

2.4. Taking into account the new type of community "SPORT".

The new type of collectivity "SPORT" added in eHealth db is taken into account and available in the integrated look up tool in Script and forms.
