## API Documentation

- ACC : <https://portal-acpt.api.ehealth.fgov.be/>
- PROD : <https://portal.api.ehealth.fgov.be/>

# 2. Updated features

## 2.1. WebApp : new collectivity type SPORT

In the collectivity search, it is now possible to search for “sport” collectivities.

## 2.2. WebApp : prevent sampling id containing only spaces

When filling the sampling id, it was possible to add spaces as sampling id. We now prevent that.

## 2.3. WebApp : bug fix with dashboard pagination

There was a non-blocking issue with the pagination state storage of the dashboard:

1. User consults page 2 or more of the dashboard
2. User leaves the application
3. Time passes and some prescriptions will not be shown anymore due to the last 14 days limit
4. User comes back and wants to see the dashboard
5. Application shows page 2 or more but there is not enough prescription anymore to be shown on that particular page
6. User has to come back on page 1 in order to see the prescription

## 2.4. New source : MOBILE\_TESTING

A new source is now accepted: MOBILE\_TESTING.

This source is to be used for the mobile teams for the clusters discovery.
