TABLE OF CONTENTS

1. Release

RELEASE NUMBER	1.6.0	
TYPE		
APPLICATION	Vaccination	
VERSION		
DATE ACCEPTATION	09/04/2021	
DATE PRODUCTION	13/04/2021	

API Documentation

- ACC : https://portal-acpt.api.ehealth.fgov.be/
- PROD : https://portal.api.ehealth.fgov.be/

2. Updated features

2.1. Business rules modifications

2.1.1. Add timestamp for last update

An export of certain information on the person, vaccination, notifications and schedules will be done for Flanders (the ssin and the vaccination code will be encrypted). To make this possible, vaccination codes database stores now the timestamps of the last update information about :
- The vaccination
- The notification
- The person

2.1.2. Last minute booking rules changes

After a business decision, a person with a non-active code is again considered eligible and a schedule with the flow "LAST_MINUTE_BOOKING" can now be made for this person.

2.2. API modifications

2.2.1. Last minute booking eligibility

An extra field "priority" is added in the response. This allows the last minute booking software to select highest priority people first.

The priority is calculated internally. The lowest number is the highest priority.
