"De Corona-alert app is nuttig om mensen waarmee men nauw contact heeft gehad, maar van wie men misschien de naam niet kent, te kunnen verwittigen als men besmet zou zijn met het Covid19 virus. Deze app is ontwikkeld in opdracht van de overheid. De app werkt volledig anoniem en registreert niet waar je bent geweest. Met het gebruik van de Coronalert-app kunnen veel meer mensen bereikt worden om op deze manier de verspreiding van het virus nog meer in te dijken.
Als je interesse hebt in de Coronalert-app, dan kan je deze downloaden via https://coronalert.be/nl "
Q13 "Heel erg bedankt voor uw medewerking en spoedig herstel. Voor medische vragen kan u natuurlijk altijd contact opnemen met uw huisarts. Voor andere vragen kan u naar de website www.info-coronavirus.be surfen."

2.3. Script 2E – New data "Country of departure" comes from PLF and isolation address autofill

In script 2E, the "coutry of derparture" has been added to the form.

This data will be displayed only when the value is provided by Saniport, and the field is "read only" (the value can't be replaced).

The isolation address will be automatically filled in when the value is provided by Saniport.

2.4. Script 2E Field Agent – New data "Country of departure" comes in the report

In the 2E field agent report a new column with the country of origin has been added

2.5. Script 2E Advice – evaluated by saniport

In the 2E Script the advice is evaluated by saniport based on this algorithm
