- PROD : <https://portal.api.ehealth.fgov.be/>

2. Updated features

2.1. Business rules modifications

2.1.1. Free test eligibility

To decrease the large amount of questions from citizens about free tests, VCD returns a more specific reason so that the citizen knows why he cannot receive his free test.

If the citizen is not eligible, this method returns now one of the following errors translated in all languages (French, Dutch, English and German) :

- AGE_NOT_ALLOWED
 - You do not have the minimum age required to be able to get a free PCR test. It can be received by people from 6 years old.
- NO_ADDRESS_IN_BELGIUM
 - No valid Belgian address has been found.
- PERIOD_BETWEEN_INVITATION_AND_FIRST_INJECTION_RECEIVED_TOO_LONG
 - The period between the invitation to get vaccinated and the first injection is too long.
- FIRST_INJECTION_RECEIVED_TOO_LONG_AGO
 - The date of your first injection is too old.
- MORE_THAN_ONE_INVITATION
 - You have been invited more than once to get vaccinated.

After each error message, there is an additional text which redirects the citizen to the site explaining all the conditions to obtain a free test and which lists the most frequently asked questions (<https://www.info-coronavirus.be/en/testing/#faq>).

For people who cannot get the vaccine due to a medical reason, an alternative verification of the eligibility is done. The verification about the vaccination status is skipped. It allows those people to get a free PCR test.
