1. Release

RELEASE NUMBER		
TYPE		URGENT
APPLICATION	Script & Forms	
VERSION		
DATE ACCEPTATION	17/11/2021	
DATE PRODUCTION	18/11/2021	

2. New features

2.1. Determining a “reference date” for the initial advice given to the citizen

Impacted scripts : All

In addition to CR134 “Keep original advice in 2A independently from current date”, a new optimization is made to keep the number of PCR tests initially given to the citizen at the time of processing.

When submitting a form as “*Double, Successful or Unsuccessful*” for the first time, the date at that moment will be saved in the form (and displayed under the button “submit”).

Commentaar op de oproep

Formulier indienen

Eerste indiening: 17 nov. 2021 16:09

Now this date will be used as a *reference date* in the script to determine for example:

- whether a person is under 12 years or not
- the number of tests that are required depending on the last contact date

As long as the form was not submitted, “now” will be used at the reference date.

2.2. Script 2C - Removal of control question n°2

Following several cases (very limited) in the past weeks of people that receive a high risk exposure in Coronalert app but don't have any contacts, the control question 2 is removed from script 2C.

Controlevraag 2: "Kan u me vertellen wat er op de eerste lijn in de rode kader van "Higher risk" staat?"

i Informatie aan de call agent: Het juiste antwoord is "number exposure". Het antwoord moet minimum 1 zijn. Als de persoon zegt dat er "No exposure up to now" staat, dan heeft hij/zij een groen scherm (en geen rood) en zal dit script afgerond worden.
